STATEMENT OF SUBSTANCE OF INTERVIEW OF JANUARY 9, 2007

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Sir:

Following the telephonic interview between Examiner Nabila G. Ebrahim and the undersigned, conducted on January 9, 2007, and the Interview Summary mailed by the Office on January 17, 2007, Applicants present the following Statement of Substance of the Interview according to MPEP 713.04.

No exhibit was shown or demonstration conducted. Applicants agree with the Examiner's statement of the claims discussed and the identification of the prior art discussed in the Interview Summary. No specific proposed amendments were discussed, but the general thrust of Applicants' arguments was that the subject matter of the present application is directed to antibodies that do not recognize fullerenes, whereas Erlanger was directed to antibodies that

are specific to and can recognize fullerenes. The Examiner's response was as reported by her in the Interview Summary; however, Applicants did not state they would take her exact suggestion, and instead indicated they would consider it along with other possible amendments that would both clarify the distinction over Erlanger and find support in the specification. For this reason, Applicants considered that agreement was not reached. No other pertinent matters were discussed.

The Examiner is invited to contact the undersigned to resolve any outstanding issues related to this or any other paper.

Respectfully submitted,

WILLIAMS, MORGAN & AMERSON, P.C.
